DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a method of introducing a plastic raw material liquid.

Group II, claim(s) 5-10, drawn to an apparatus for introducing a plastic raw material liquid.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature in both groups is

- a plurality of liquid delivery units disposed parallel to each other for discharging a plastic raw material,
- a junction interconnecting the delivery units, and
- a casting polymerization mold for receiving the combined plastic raw material liquid. This cannot be a special technical feature under PCT Rule 13.2, because the feature is known in the prior art. U.S. Patent No. 4,328,967 discloses a method and apparatus for introducing a plastic raw material, comprising
- a plurality of liquid delivery units (12, 14) disposed parallel to each other (fig. 1) for discharging a plastic raw material (16, 18),
- a junction interconnecting the delivery units (64), and
- a casting polymerization mold (66) for receiving the combined plastic raw material liquid (fig. 1).

3. A telephone call was made to Brett Sylvester on June 4, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
